	Description 3 to the second se	CEO2'
, ECV	You are given an array A of N integers. An equilibrium position is a position where the sum of all integers on its left is equal to t	the sum
o o	of all integers on its right in the array A. Print the index of the equilibrium position.	·5~
17 418235	Note :For any given array there is only a single equilibrium position, if no equilibrium position is found then print "NOT FOUND" v quotes.	vithout
ν'	The array is 1 indexed.	Without With 3 f.C
207		
373ECEOT	Input Format:	2027
	The input consists of two lines:	3ECE021
4JR	The first line contains an integer denoting N.	
, £021 KUP	The second line contains N space-separated integers denoting the elements of the array A.	21 K182
